

**“In the last five years, we have achieved amazing energy savings that would have never been possible without Efficiency Vermont's assistance.”**

*– Dave LaForce,  
Co-owner, Built by Newport,  
Newport, VT*

# Savings just got cheaper

Efficiency Vermont is committed to advancing clean energy solutions that help you save money. The Energy Efficiency Charge (EEC) that appears on your electric bill each month helps us do that—enabling us to reduce the cost of efficient technologies, build our clean energy workforce, help businesses reduce operating costs, and do so much more.

Just as you look for ways to do more with less, so do we. In 2018, Efficiency Vermont will provide the same level of service with a lower budget, resulting in an EEC rate adjustment of an 8.4% decrease for commercial customers, an 11.1% decrease for industrial customers, and a slight 1% increase for residential customers\*. The chart on the back side shows the new EEC rates for 2018, set by the Vermont Public Utility Commission. Energy efficiency is a key part of our state's strategy to provide low-cost, clean, and reliable power today and for years to come. Every \$1 invested in energy efficiency yields \$3.80 in savings. Take advantage of our energy services by visiting [www.encyvermont.com](http://www.encyvermont.com).

*\*Due to under-collections in 2017, the residential rate will increase by 1% despite Efficiency Vermont's decreased budget. For the average residential customer, this will amount to 8 cents more per month.*
