

Member Update

*Commercial/Industrial Edition
Spring 2019*

If you're planning to construct a new facility or install new equipment, and think you might need to change your electrical service, please contact VEC as soon as possible. That way, if upgrades are necessary, we can be sure to have your service ready when you need it. There's more information [here](#).

VEC offering assessments to businesses, farms

Have you ever wondered if you could save money on heating or cooling in your facility by updating your systems, but haven't had time to do the analysis? VEC is working with a Vermont-based partner organization to offer free, no-obligation energy assessments to farms, sugarmakers, and other commercial enterprises to see if renewable thermal energy technologies could save them money. Learn more [here](#) (PDF).

Are your outdoor crews safe this summer?

Ticks, bees, poison parsnip, sun and heat, vehicle traffic - these are just a few of the safety risks facing crews working outside in the summer. If you want to learn more about how to reduce risks posed to your crews, please contact VEC's Safety Department at 802-635-2331. You can also learn more [here](#).

SmartHub can help you avoid usage surprises

For many businesses, summer means higher electricity use. The first step in managing your electricity expenses is closely monitoring your use, and you can do that (and lots more) using an online tool known as [SmartHub](#). Consider signing up if you haven't already!
